# TokenGifts - Ambassador Program

TokenGifts is a Web3.0 mini program based on Telegram.

In the Telegram ecosystem, digital currency gifts are used as a link to reach users in the simplest way, which also brings high-quality groups to the project party and links the project party with player users.

TokenGifts is launching an ambassador program to accelerate the growth of the ecosystem. We are now expanding our community through a structured ambassador program that aims to empower multiple parties who are keen to advance Telegram, TON, Web3.0, users, project parties, etc. through TokenGifts.
